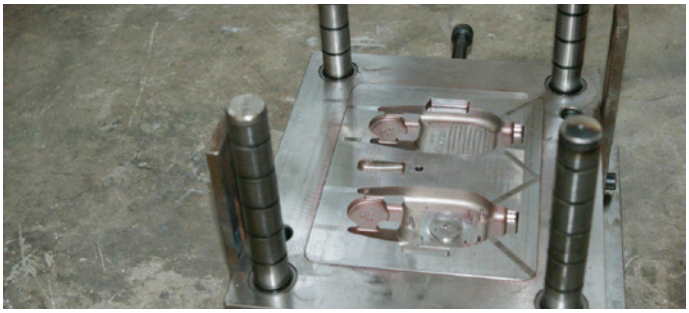
Born from a genuine interest of communication products

The ProEquip series is created by VHF Group which is the leading company group in radio communication systems and terminals in Scandinavia with over 35 years of experience in the radio business. VHF Group delivers yearly about 70 000 terminals and way over 200 000 accessory items.

VHF Group has today a firm grip of the market and over 20 years of experience of closely working together with the Scandinavian police force in order to produce tailor made, customized accessories that meets the most demanding radio user group in the market. VHF Group is able to sell ten of thousands of accessories to these demanding radio users due to listening to what the users want and several years of working together with specially chosen suppliers in Asia.

All items in the ProEquip series are handpicked from closely selected suppliers in order to fulfill the high demands we set on the products launched under the ProEquip name. The accessories have a robust and waterproof construction and all connectors are extra strengthening to endure more stress.



VHF Group has well established relationships for:

Manufacturing

- Work with contract manufacturers in Taiwan, China and USA for battery packs, chargers and power related accessories.
- Manufacturing and sub-assembly for finished products and parts for 2-way communication accessories and modules.

Engineering

- Management of global R&D with engineers in Taiwan, China, and the USA
- Current Design and Engineering capabilities
- Design engineering of components, battery packs, chargers and accessories
- Management of qualification testing facilities
- Six Sigma and SPC for design and manufacturing

Supply Chain Management

- Management of global supply chain with operations in Taiwan, Hong Kong and China
- Interface with global plastic, rechargeable cell and IC manufacturers

Quality Control

- Management of global quality organization with operations in USA, Taiwan and China
- Quality system assessments and improvement plans
- Systems for design and manufacturing

OEM Production

In the accessory area, VHF Group has many years of experience in production and development and we do many OEM jobs for famous companies that wants special products.

For OEM project, VHF Group has connections for 100% creating ability and production line for any design. Our experienced quality/development group and tooling/inject equipment can offer outstanding opportunity creation and our customer will also have fast shipment in reasonable price conditioning.

The ProEquip series is a product line specially designed to meet the high demands from the market. The accessories have a robust and waterproof construction and all contacts are extra strengthend to endure more stress. Most of the ProEquip product range is constructed to meet IP-65.

Direct lead Wireless Speaker Microphone

Extend your range

The PRO-SP960/980 is a 2.4 GHz secure wireless microphone powered with frequency hopping spread spectrum technology specifically designed for use with mobile radios.

This new breakthrough device allows mobile radio users for the very first time to create a cost effective wireless connection to their mobiles. Allowing users to communicate wirelessly over long distances (up to 300 metres) with clear secure audio. PRO-SP960/980 is ideal for delivery or service personnel who need to constantly get in and out of their commercial vehicles. With the PRO-SP960/980 they can now remain in constant communication with their mobile radio whilst out of the vehicle.

Our innovative product will not only change the way you interact with your mobile radio, it's also comfortable, light weight and easy to use.

Features

- Up to 300 metres outdoor range
- Suits most manufacturers' mobile radios
- Rugged removable belt clip
- IP55 weatherproof design
- 3.5 mm earpiece socket
- 10+ hour operation
- Hirose 6 pin accessory connector
- Emergency button

NATEK Accessories

In 1996 Natek developed a very unique battery charger. The Method enabled the batteries to have full capacity after each charge regardless of number of charges. This was quite ground breaking at that time. For Li-Ion batteries start charging if the battery voltage drops to a predetermined level. This means that you always have a full battery when you need it. Natek chargers can be found in greater numbers in the Pols, Military and rescue service. In total, over the years about 45,000 charging points have been delivered just in Sweden.

All the products you can see in the catalogue are stock products that you normally can get with short lead time if they are not temporary sold out. VHF Group carries over 3 000 active articles and have regularly over 150 000 items in stock. This means that you can trust us in getting products for your needs and when you need them.

VHF Group

The VHF Group AS is an international holding company with head office in Oslo, Norway. The companies that form the VHF Group have been active since the late 1960s. The VHF Group was founded in 1980.

The Group was founded in order to improve our marketing profile and our negotiation position in relation to our suppliers. This in turn has helped us to become more competitive and increase our market share. The Group has companies in Sweden, Norway, Denmark and Poland, as well as exclusive agreements with external agents in Iceland and Finland.

The focus and area of activity of the VHF Group is wireless communications. Our core business is the import and distribution of products and services, as well as related support. Sales to end customers are handled by our broad network of highly skilled resellers.

We are a growth-oriented group of companies with our own competence within marketing, service, support, logistics, IT and administration. We do not conduct costly hardware development and as such we have been able to create a stable financial platform to relay on for the future. We do, however, carry out some changes to our products to ensure that they are suited to the Nordic market and we also do customisation.

An annual turnover of around Euro 45 millions and 100+ employees make the VHF Group one of the largest privately-owned wireless communications companies in Scandinavia.

We have a wide range of suppliers and our key contacts include Icom Inc, Sepura, DAMM and Frequentis. We cooperate closely with these suppliers and as a result we have access to feedback from the market, which helps us to meet the ever-changing needs of our customers.
